

INOQ Rhodazo

Charge: C-0238

Garden and Landscaping, especially for Erica

- ✓ Blends perfectly with all substrates
- ✓ Increases absorption of water
- ✓ Improves soil structure and aggregation
- ✓ Increases humus content
- ✓ May be used in organic farming in accordance EC Commission regulation 848/2018 Appendix II 1.9.6

Soil amendment/biostimulant

By using highmoor peat and living microorganisms

For soil improvement and increase of biological activity

If product-related application recommendations are followed, the total nutrient input is below the maximum values specified by the DüVO §4 (3) 2.

0,7 % Nitrogen (N)

53,63 % Organic substance

Net Volume 1 l

Distributor

INOQ GmbH, CEO: Dr. Carolin Schneider, Solkau 2, 29465 Schnega, Germany

Tel. ++49/58 42/98 16 72, Fax. ++49/58 42/4 93, info@inoq.de, www.inoq.de

Raw Material

Highmoor peat and living Microorganism

Ericoid mycorrhizal fungi
Rhizoscyphus ericae

0,13 % Sulfur (S)

Storage

2 years, in room temperature under dark and dry conditions

Dosage

Blending into substrate

5 – 10 % (plant production)

Spreading into planting hole

20 ml / plant (up to 12 cm pot)
up to 100 ml / plant (up to 10 l planter)

Existing plant formations

According to size of plant up to
100 ml / plant in drilling holes

Surface treatment

up to 100 ml / m²

Further informations

The microorganisms used are indigenous strains. No genetically modified organisms (GMOs) are used

Mycorrhiza Effectiveness

(increased growth [%] in standardized test)

24 ± 6

Specific weight [g/l]

250 - 400

Tolerance against fungicides

proven

Health and safety information

No special precaution necessary
Avoid breathing or ingestion
Absence of phytopathogens proven
(DNA multiscan®)
Material Safety Data Sheet available

Packaging

1 Liter, 5 Liter, 10 Liter, 25 Liter, 1000 Liter
