

INOQ Agri

Charge: C-0052

Recultivation, Blending with seeds, Blending with fertilizer or substrate

- ✓ High trickle ability
- ✓ High efficiency of water absorption
- ✓ Improved air, water and fertilizer supply for the plant
- ✓ used in organic farming in accordance EC Commission regulation 889/2008 Article 3 (4)

Soil amendment/biostimulant

By using vermiculite and living microorganisms
For soil improvement and increase of biological activity

0,47 % Phosphate (P_2O_5), 0,72 % Potassium oxid (K_2O)

Net Volume 1000 l

Distributor

INOQ GmbH, CEO: Dr. Carolin Schneider, Solkau 2, 29465 Schnega, Germany
Tel. ++49/58 42/98 16 72, Fax. ++49/58 42/4 93, info@inoq.de, www.inoq.de

Raw Material

Vermiculite and living Microorganism

Endomycorrhizal Fungi
Rhizogloium irregulare
Funneliformis mosseae
Funneliformis caledonium

10,38 % Magnesium (Mg), 0,0049 % Cobalt (Co), 21,74 % Calcium oxid (CaO)

Storage

2 years, between 4 °C and 15 °C under dark and dry conditions

Dosage

Blending with seeds

10 – 20 ml/corn

Blending with substrate

5 – 10 % (recommendation)

Spreading into planting hole

20 ml / plant (up to 12 cm pot)
up to 100 ml / plant (up to 10 l planter)

Existing plant formations

According to size of plant up to
100 ml / plant in drilling holes

Surface treatment

up to 100 ml / m²

Further informations

Regarding genetic engineering: The microorganisms used are indigenous strains. No genetically modified organisms (GMOs) are used

Mycorrhiza Units (per ml)

145

Mycorrhiza impact

47 ± 8

(enhancement of growth [%] in standard test)

Specific weight [g/l]

350 - 480

Tolerance against fungicides

proven

Health and safety information

No special precaution necessary
Avoid breathing or ingestion
Absence of phytopathogens proven
(DNA multiscan®)

Material Safety Data Sheet available
5 Liter, 10 Liter, 25 Liter, 1000 Liter

Packaging
