

INOQ Special

Charge: C-0044

Garden and Landscaping, Plant Production, Recultivation

- ✓ Blends perfectly with all substrates
- ✓ Increases absorption of water
- ✓ Improves soil structure and aggregation
- ✓ Increases humus content
- ✓ May be used in organic farming in accordance EC Commission regulation 889/2008 Article 3 (4)

Soil amendment/biostimulant

By using highmoor peat, clay, perlite and living microorganisms
For soil improvement and increase of biological activity

0,59 % Nitrogen (N)
0,48 % Phosphate (P₂O₅)
0,3 % Potassium oxid (K₂O)
27 % Organic substance

Net Volume 1000 l

Distributor

INOQ GmbH, CEO: Dr. Carolin Schneider, Solkau 2, 29465 Schnega, Germany
Tel. ++49/58 42/98 16 72, Fax. ++49/58 42/4 93, info@inoq.de, www.inoq.de

Raw Material

Highmoor peat, clay, perlite and living Microorganism
Endomycorrhizal Fungi
Rhizogloium irregulare
Funneliformis mosseae
Funneliformis caledonium

0,23 % Sulfur (S), 0,35 % Magnesium (Mg),

Storage

2 years, between 4 °C and 15 °C under dark and dry conditions

Dosage

Blending into substrate

2 to 5 % (seedling production)
5 to 10 % (plant production)

Spreading into planting hole

20 ml / plant (up to 12 cm pot)
up to 100 ml / plant (up to 10 l planter)

Existing plant formations

According to size of plant up to
100 ml / plant in drilling holes

Surface treatment

up to 100 ml / m²

Further informations

Regarding genetic engineering: The microorganisms used are indigenous strains. No genetically modified organisms (GMOs) are used

Mycorrhiza Units (per ml)

145

Mycorrhiza Effectiveness

54 ± 8

(increased growth [%] in standardized test)

Specific weight [g/l]

220 - 360

Tolerance against fungicides

proven

Health and safety information

No special precaution necessary
Avoid breathing or ingestion
Absence of phytopathogens proven
(DNA multiscan®)
Material Safety Data Sheet available
10 Liter, 25 Liter, 1000 Liter

Packaging
